JOURNAL OF MODERN OPTICS

Board of Editors

P. L. Knight (Editor)	Optics Section, Blackett Laboratory, Imperial College, London, SW7 2BZ, UK
R. W. Boyd (North American Editor)	The Institute of Optics, University of Rochester, Rochester, New York 14627, USA
S. M. Barnett	University of Strathclyde, Glasgow, UK
O. Bryngdahl	Universität-Gesamthochschule, Essen, Germany
K. Burnett	University of Oxford, UK
N. Doran	University of Aston, Birmingham, UK
W. J. Firth	University of Strathclyde, Glasgow, UK
V. S. Letokhov	Institute of Spectroscopy, Academy of Sciences, Moscow, USSR
H. A. Macleod	University of Arizona, Tucson, Arizona, USA
D. Maystre	Faculté des Sciences et Techniques de St Vérôme, Marseille, France
G. M. Morris	University of Rochester, Rochester, New York, USA
F. Persico	Istituto di Fisica dell'Università degli Studi, Palermo, Italy
J. G. Rarity	Defence Research Agency Electronics, Malvern, Worcs., UK
J. R. Sambles	University of Exeter, UK
R. M. Sillitto	University of Edinburgh, UK
Shun-ichi Tanaka	Science University of Tokyo, Shinjuku, Tokyo, Japan
A. C. Tropper	University of Southampton, UK
G. Tribillon	Université de Franche-Compte Besançon, France
M. Vaughan	Defence Research Agency, Malvern, Worcs., UK
E. Wolf	University of Rochester, Rochester, New York, USA
F. Wyrowski	Berlin Institute of Optics, Germany

International Advisory Editorial Board

L. R. Baker (Chairman and Secretary)	Sira Ltd, South Hill, Chislehurst, Kent BR7 5EH, UK

CONTENTS OF VOLUME 41

No. 1 January 1994

Letters

- 1 Refractive-index profiles of double-silver-exchanged glass systems**
F. Gonella and A. Quaranta
- 5 Simultaneous characterization of surface and buried waveguides produced by ion-exchange in glass**
J. Liñares, C. Montero, X. Prieto and R. de la Fuente
- 11 350fs pulse generation from an erbium fibre ring laser mode locked using nonlinear polarization rotation**
N. Pandit, D. U. Noske and J. R. Taylor
- 15 A simple achromatic half-wave retarder**
P. Hariharan and D. Malacara

Papers

- 19 Dichromated gelatine transmission holograms for 1.5 μ m wavelength**
H. Kobolla
- 31 Near-field soft X-ray diffraction modelled by the multislice method**
A. R. Hare and G. R. Morrison
- 49 Nonlinear near field optics**
J. M. Vigoureux, C. Girard and F. Depasse
- 59 Guided electromagnetic waves in a parallel-plate gyroelectromagnetic biaxial chirowaveguide**
Yin Wenyan, Li Pao and Wang Wenbing
- 67 Non-classical properties of non-degenerate parametric amplifiers and oscillators with pump depletion and non-homogeneous losses using the Wigner representation**
J. Martinez-Linares and P. Garcia-Fernandez
- 89 A direct mapping algorithm for phase-measuring profilometry**
W.-S. Zhou and X.-Y. Su
- 95 Interaction of focused radiation with magneto-optical discs. The writing process**
R. Kant
- 111 Defocus correction using a visibility criterion**
P. Torroba, N. Cap and H. Rabal
- 119 A robust cellular processor for phase unwrapping**
M. Servin, R. Rodriguez-Vera and A. J. Moore

- 129 Fast computation of second-order derivatives of reflectance, transmittance and corresponding phase shifts in thin film systems**
Jiří Hrdina
- 137 Seidel aberrations in optical processors due to diffraction of a quasi-spherical wavefront**
J. M. Simon and S. A. Comastri
- 151 Generation of even and odd coherent states in the intensity dependent Jaynes-Cummings model**
K. Zaheer and M. R. B. Wahiddin
- 163 Erratum**
- 165 Book reviews**

No. 2 February 1994

Special Issue: Photonic Band Structures

Introduction

- 171 Special Issue on Photonic Band Structures**
G. Kurizki and J. W. Haus

Papers

- 173 Photonic crystals**
E. Yablonovitch
- 195 A brief review of theoretical results for photonic band structures**
J. W. Haus
- 209 Photonic band structures**
J. B. Pendry
- 231 Photonic band calculations for woodpile structures**
H. S. Sözüer and J. P. Dowling
- 241 Photonic bandgaps: what is the best numerical representation of periodic structures?**
P. R. Villeneuve and M. Piché
- 257 Two-dimensional photonic band-gap materials**
J. N. Winn, R. D. Meade and J. D. Joannopoulos
- 275 Out of plane propagation of electromagnetic waves in a two-dimensional periodic dielectric medium**
A. A. Maradudin and A. R. McGurn
- 285 Photonic band structure calculations using a two-dimensional electromagnetic simulator**
W. M. Robertson, S. A. Boothroyd and L. Chan
- 295 Analysis of the filling pattern dependence of the photonic bandgap for two-dimensional systems**
R. Padjen, J. M. Gerard and J. Y. Marzin

- 311 Resonance dipole-dipole interaction in electromagnetically confined geometries**
G. Kweon and N. M. Lawandy
- 325 Spontaneous emission from planar microstructures**
D. G. Deppe, C. Lei, C. C. Lin and D. L. Huffaker
- 345 Anomalous index of refraction in photonic bandgap materials**
J. P. Dowling and C. M. Bowden
- 353 Spontaneous and induced atomic decay in photonic band structures**
A. G. Kofman, G. Kurizki and B. Sherman
- 385 Investigation of absolute photonic band gaps in two-dimensional dielectric structures**
S. Y. Lin, G. Arjavalingam and W. M. Robertson
- 395 Defect studies in a two-dimensional periodic photonic lattice**
D. R. Smith, S. Schultz, S. L. McCall and P. M. Platzmann

No. 3 March 1994

Letter

- 405 Evolution of laser thermal written diffraction gratings in liquid-crystal polymer films**
D. C. Ulrich and S. J. Elston

Papers

- 413 Reflection and refraction in uniaxial crystals with dielectric and magnetic anisotropy**
M. C. Simon and D. C. Fariás
- 431 Non-classical and noise properties for light through a nonlinear fibre with gain**
Luo-Yu Feng, Feng Qian and Lu-Bi Deng
- 447 Direct current through a photoconductive crystal in an asymmetric a.c. field**
A. V. Dooghin, Yu. V. Miklyaev and B. Ya. Zel'dovich
- 453 Two atom-single mode radiation field interaction. State evolution, level occupation probabilities and emission spectra**
Ho Trung Dung and Nguyen Dinh Huyen
- 471 Multimirror scanning spectropyrometer**
S. M. Chernin
- 481 Array generation using double wedge plate interferometer**
P. Senthilkumaran, K. V. Sriram, M. P. Kothiyal and R. S. Sirohi
- 491 Optical Bloch equations in the presence of stochastic broadband vacuum**
E. Kahler and K. Wódkiewicz

- 503 Time evolution of radiation in a damped cavity**
H. F. Arnoldus
- 517 $U(1/1)_q$ - q -coherent states and the q -deformed Jaynes–Cummings model**
Le-Man Kuang
- 525 Coherent phase state and displaced phase state in a finite-dimensional basis and their light field limits**
G. Gangopadhyay
- 543 Optimization of homogeneous refracting waveguide lens systems by ray tracing**
Z. Nikolov and B. G. Pantchev
- 553 Phase destruction and quantum non-demolition measurement of photon number by atomic beam deflection**
U. Herzog and Th. Richter
- 563 The measurement of the triggered probability density as an alternative to the direct evaluation of the triple correlation**
L. Vega, M. P. Cagigal and P. Prieto
- 569 Squeezing properties of Jaynes–Cummings fields in heat baths**
M. S. Kim, Min Gyu Kim and K. S. Lee
- 581 A lateral restraining device for large telescope mirrors. How to control a hydraulically supported body in all six degrees of freedom**
R. Bauer and R. Kuhn
- 589 Measurement of large out-of-plane displacements using two source holographic interferometry**
P. K. Rastogi and L. Pflug
- 595 Measurement of the optical force and trapping range of a single-beam gradient optical trap for micron-sized latex spheres**
C. D’Helon, E. W. Dearden, H. Rubinsztein-Dunlop and N. R. Heckenberg
- 603 Theoretical investigation of photorefractive ring passive phase-conjugate mirror in the presence of asymmetric transmission**
Xuefeng Yue, Zongshu Shao, Jun Chen, Yongyuan Song and Huanchu Chen
- 609 Photon statistics of the three-level one-atom laser**
T. Pellizzari and H. Ritsch
- 625 Uniform approximation to Mie resonances**
L. G. Guimarães and H. M. Nussenzveig
- Short communication*
- 649 Diffuse-object holograms in silver halide sensitized gelatin**
A. Fimia, I. Pascual, L. Carretero and A. Beléndez
- 655 Book reviews**

No. 4 April 1994

Letters

- 659 **Measurement of the derivatives of curved surfaces using speckle interferometry**
P. K. Rastogi
- 663 **The geometric phase: interferometric observations with white light**
P. Hariharan, K. G. Larkin and M. Roy
- 669 **Picosecond phase conjugation and two-wave coupling in strontium barium niobate**
H. Y. Zhang, X. H. He, Y. H. Shih and L. Yan
- 675 **Enhancing the axial resolution in far-field light microscopy: two-photon 4Pi confocal fluorescence microscopy**
S. W. Hell, S. Lindek and E. H. K. Stelzer

Papers

- 683 **Direct static strain measurement utilizing signal fading and spectrum analysis in a fibre optic interferometric sensor**
V. S. Sudarshanam
- 695 **Diffraction from corrugated gratings made with uniaxial crystals. Rayleigh methods**
R. A. Depine and M. L. Gigli
- 717 **PLZT based high-efficiency electro-optic grating for optical switching**
Q. Wang Song, P. J. Talbot and J. H. Maurice
- 729 **Angular power spectra of fractal structures**
A. Dogariu, J. Uozumi and T. Asakura
- 739 **The relation between the covariant and the non-covariant pictures of totally polarized light beams**
D. Beldiceanu
- 751 **The importance of phase information for constructing model partially coherent sources**
A. Stacey
- 757 **Diffraction optical elements with spiral phase dislocations**
C. Paterson
- 767 **VUV and UV fluorescence and absorption studies of Tb^{3+} and Tm^{3+} trivalent ions in $LiYF_4$ single crystal hosts**
E. Sarantopoulou, A. C. Cefalas, M. A. Dubinskii, Z. Kollia, C. A. Nicolaides, R. Yu. Abdulsabirov, S. L. Korableva, A. K. Naumov and V. V. Semashko
- 777 **Coupling between parallel circular open chirowaveguides**
H. Cory and E. Segall
- 791 **High-sensitivity diffraction-compensated moiré deflectometry**
S. K. H. Auluck
- 807 **Phase defects in a phase-conjugate photorefractive-gain oscillator**
G. Balzer, S. Matamontero, M. Vasnetsov and T. Tschudi

- 817 Chromatic dispersion effects on infrared single-mode all-fibre optic double Fourier interferometric imaging**
Z. Peiqian, P. Léna, J.-M. Mariotti and V. Coudé du Foresto
- 827 On the validity of soft-particle approximations for the scattering of light by infinitely long homogeneous cylinders**
S. K. Sharma

No. 5 May 1994

Letters

- 839 Zeno paradox and radiation trapping in three-level systems**
A. L. Rivera and S. M. Chumakov

Papers

- 847 Quantum propagation of light in a Kerr medium. Renormalization**
I. Abram and E. Cohen
- 885 Self-induced mode as a building element of transversal pattern formation**
R. Neubecker and T. Tschudi
- 907 New quantum effects in the dynamics of a two-mode field coupled to a two-level atom**
G. Benivegna and A. Messina
- 927 Dynamics of an actively mode-locked tunable solid-state laser in the case of detuning**
O. Haderka and P. Malý
- 941 Model of vortices nucleation in a photorefractive phase-conjugate resonator**
G. Indebetouw and D. R. Korwan
- 951 Optical fibre grating demultiplexer-multiposition switch using a single gradient-index-rod lens**
T. Sakamoto
- 963 Commutation rules and eigenvalues of spin and orbital angular momentum of radiation fields**
S. J. van Enk and G. Nienhuis
- 979 Optical processing using a birefringence-based spatial filter**
T. K. Acharya, K. Bhattacharya and A. Ghosh
- 987 Cross and parallel polarization coupling in transmission-type degenerate four-wave mixing in compound semiconductor photorefractive crystals: orientational dependence**
A. Roy and K. Singh
- 1001 Spectral and dispersion analysis of laser sources and multimode fibres via the statistics of the intensity pattern**
P. Hlubina
- 1015 Non-stationary two-photon Doppler-free coherent spectroscopy in an atomic gas in the presence of depolarizing collisions**
A. I. Alekseev and V. N. Beloborodov

- 1027 Theoretical studies of synthetic imaging properties of optical arrays in third-order aberrations**
Baida Lü and Guilin Ding
- 1037 The fractional Fourier transform in optical propagation problems**
T. Alieva, V. Lopez, F. Agullo-Lopez and L. B. Almeida
- 1045 Three-dimensional computer reconstruction of random rough surface**
M. Burova and J. Burov
- 1051 Book reviews**

No. 6 June 1994

Special Issue: Eleventh National Quantum Electronics Conference

- 1053 Foreword**
Papers
- 1055 Three-level atom in a squeezed vacuum II. Resonance fluorescence**
S. Smart and S. Swain
- 1079 Non-diffusive phase dynamics from linear amplifiers and attenuators in the weak-field regime**
J. A. Vaccaro and D. T. Pegg
- 1087 Spectroscopy of laser-cooled ions**
R. C. Thompson, K. Dholakia, G. Zs. K. Horvath, W. Power and D. M. Segal
- 1099 Laser-induced continuum structures and above-threshold ionization**
B. J. Dalton and M. E. StJ. Dutton
- 1121 Propagation of squeezed light in dielectrics**
J. Jeffers and S. M. Barnett
- 1135 Study of transverse effects in optical bistable ring resonators using the finite element method**
P. A. Buah, B. M. A. Rahman and K. T. V. Grattan
- 1141 Theory of the polarization dependence of two-photon absorption in zinc-blende semiconductors**
D. C. Hutchings and B. S. Wherrett
- 1151 Spatiotemporal dynamics of optical parametric oscillators**
G.-L. Oppo, M. Brambilla, D. Camesasca, A. Gatti and L. A. Lugiato
- 1163 Angularly-resolved high-order harmonic generation in helium**
J. W. G. Tisch, R. A. Smith, M. Ciarrocca, J. E. Muffett, J. P. Marangos and M. H. R. Hutchinson
- 1173 Spatial chaotic power cross-talk in nonlinear multibeam co-propagation in optical fibres**
De Jin Yu and R. G. Harrison
- 1179 The CHIRP II high-power excimer laser**
J. Fieret, R. Heath, A. Lawrence, M. R. Osborne, S. J. Osbourn, T. Stamatakis and R. J. Winfield

- 1193 Optical measurement of excimer laser current pulses**
E. Hodgson, A. D. Boardman, Y. Hua and A. Wilson
- 1203 Sprite. A very high brightness, ultraviolet laser system**
J. M. D. Lister, E. J. Divall, S. W. Downes, C. B. Edwards, G. J. Hirst, C. J. Hooker, M. H. Key, I. N. Ross, M. J. Shaw and W. T. Toner
- 1217 Nonlinear optical properties of a soluble form of polyisothionaphthene**
S. J. Burbridge, H. Page, A. Drury, A. P. Davey, J. Callaghan and W. Blau
- 1227 A diode-laser-bar pumped stable CW Nd:YAG slab laser and its frequency doubling**
J. Hong, C. Yelland, M. H. Dunn, W. Sibbett and B. D. Sinclair
- 1231 Ti:sapphire pumped femtosecond optical parametric oscillator exhibiting soliton formation**
D. T. Reid, J. M. Dudley, M. Ebrahimzadeh and W. Sibbett
- 1243 Nonlinear excited state phenomena and electro-luminescence in fullerene crystals**
H. J. Byrne, A. T. Werner, J. Anders, W. K. Maser, M. Kaiser, L. Akselrod, W. W. Rühle, A. Mittelbach and S. Roth
- 1253 Characterization of an optimized nonlinear joint transform correlator**
B. S. Lowans, B. Bates and R. G. H. Greer
- 1263 Broadband intensity stabilization of a diode-pumped monolithic miniature Nd:YAG ring laser**
S. Rowan, A. M. Campbell, K. Skeldon and J. Hough
- 1271 A modified bandwidth K factor relationship due to parasitic effects in semiconductor lasers**
Y. C. A. Wong and K. A. Shore
- 1279 Broadband excitation and emission of surface plasmons**
P. Dawson, G. Bryan-Brown and J. R. Sambles
- 1287 Surface plasmon enhanced laser ablation of thin metal films**
P. Dawson and G. Cairns

No. 7 July 1994

Letters

- 1295 Study of the mode-locking process in a laser with an auxiliary cavity**
Z. G. Lü, Q. Wu, Q. X. Li and Z. X. Yu
- 1301 Modulation transfer function assessment for sampled imaging systems: a generalization of the line spread function**
J. Primot, M. Girard and M. Chambon

Papers

- 1307 Coherent states of a harmonic oscillator in a finite-dimensional Hilbert space and their squeezing properties**
Le-Man Kuang, Fa-Bo Wang and Yan-Guo Zhou
- 1319 Entropy evolution of the bimodal field interacting with an effective two-level atom via the Raman transition**
Mao Fa Fang
- 1327 Line-shape distortion due to self-focusing effects when using frequency modulation techniques in saturation spectroscopy**
L. Robertsson

- 1339 Second harmonic generation in ion implanted lithium niobate planar waveguides**
N. Hamelin, G. Lifante, P. J. Chandler, P. D. Townsend, S. Pityana and A. J. McCaffery
- 1349 Extended short-wavelength harmonic production using a multilayer waveguide structure**
P. D. Townsend, L. Zhang and P. J. Chandler
- 1361 Evolution of coherent states in a dispersionless fibre with saturable nonlinearity and the generation of macroscopic quantum-superposition states**
M. L. Lyra and A. S. Gouveia-Neto
- 1371 Thermal effects in Nd:YAG slabs. 3D modelling and comparison with experiments**
P. Hello, E. Durand, P. K. Fritschel and C. N. Man
- 1391 Twisted Gaussian Schell-model beams: a superposition model**
D. Ambrosini, V. Bagini, F. Gori and M. Santarsiero
- 1401 Polychromatic point spread function: calculation accuracy**
C. Font, J. C. Escalera and M. J. Yzuel
- 1415 Laser pulse shape effects in harmonic generation from a two-level atom**
E. Fiordilino and V. Miceli
- 1427 Can a Wigner function be reconstructed from experimentally determined distributions?**
U. Leonhardt and H. Paul
- 1433 An approximation method for the backward scattering of light by a soft spherical obstacle**
S. K. Sharma and D. J. Somerford
- 1445 A characterization of light scattering by small dielectric spheres**
R. J. Martin and R. P. Tatam
- 1457 Theoretical modelling of thulium-sensitized holmium continuous-wave fibre lasers**
J. Wang, M. Ahmad and T. A. King
- 1473 Polarization-independent beam splitter based on light reflection by a uniaxial crystal surface, and an immersion method for determining the crystal's principal refractive indices**
R. M. A. Azzam
- 1479 Video-based vibration analysis by modulated projected gratings**
G. O. Rosvold
- 1495 Optimal concentration of electromagnetic radiation**
C. J. R. Sheppard and K. G. Larkin
- 1507 Effect of temperature change and storage time on holographic gratings in KBr crystals with colour centres**
O. Salminen, A. Ozols and P. Riihola
- 1515 Erratum**
- 1517 Book reviews**

No. 8 August 1994

Papers

- 1521 **Imaging performance of confocal fluorescence microscopes with finite-sized source**
C. J. R. Sheppard and M. Gu
- 1531 **Fringe contrast and phase effects in multi-colour holography**
C. S. Vikram, W. K. Witherow and J. D. Trolinger
- 1537 **Fourier interpolation and reconstruction via Shannon-type techniques. I. Regularization principle**
A. Lannes, É. Anterrieu and K. Bouyoucef
- 1575 **Phase recovery in an optical imaging system with diffraction loss**
B. Dong, J. Zhuang and O. K. Ersoy
- 1591 **Analysis of optical pulse distortion through clouds for satellite to earth adaptive optical communication**
S. Arnon, D. Sadot and N. S. Kopeika
- 1607 **Determination of density matrices from field distributions and quasiprobabilities**
H. Kühn, D.-G. Welsch and W. Vogel
- 1615 **A linearized approach for diffraction-free propagation in a planar nonlinear waveguide**
R. Horák, M. Bertolotti and C. Sibilia
- 1625 **Production of macroscopic Schrödinger cat states from weak quantized cavity fields interacting with atoms driven by classical fields**
V. Bužek, Ts. Gantsog and M. S. Kim
- 1637 **Contouring by electronic speckle pattern interferometry employing divergent dual beam illumination**
Y. Zou, G. Pedrini and H. Tiziani
- 1653 **The Wolf effect in spherically symmetric systems**
G. Hazak and R. Zamir
- 1659 **Bispectrum analysis of fractal structures**
N. Wada, J. Uozumi and T. Asakura
- 1675 **Erratum**
- 1677 **Book reviews**

No. 9 September 1994

Papers

- 1679 **Reconstruction of scattering potentials from incomplete data**
T. Habashy and E. Wolf
- 1687 **Stokes-anti-Stokes interaction in the field of a transversely non-uniform pump beam**
G. P. Djotyan and J. S. Bakos
- 1701 **Three-dimensional partially-coherent image formation in confocal microscopes with a finite-sized detector**
M. Gu and C. J. R. Sheppard
- 1717 **A comparative study of the effect of noise and background clutter on optical image recognition methods**
I. Juvells, S. Vallmitjana and A. Carnicer

- 1739 Quantum-classical electrodynamic field correspondence in quantum optics**
B. Ritchie and C. M. Bowden
- 1747 Multiple beam wedge plate shear interferometry in transmission**
R. S. Sirohi, T. Eiju, K. Matsuda and P. Senthilkumaran
- 1757 Experimental demonstration of spectral modification in a Mach-Zehnder interferometer**
D. Narayana Rao and V. N. Kumar
- 1765 The birth of a phase-cat**
S. Schaufler, M. Freyberger and W. P. Schleich
- 1781 A polarized transfer matrix for electromagnetic waves in structured media**
A. S. McLean and J. B. Pendry
- 1803 Analysis of the steady-state and switch-on characteristics of a nonlinear fibre optic ring resonator**
G. F. Levy
- 1813 Emission and absorption properties of atoms in a trapping potential**
P. E. MacKay and G.-L. Oppo
- 1837 A generalized Fourier-based method for the analysis of 2D Moiré envelope-forms in screen superpositions**
I. Amidror

No. 10 October 1994

Letter

- 1863 Multimode coherent states and HeNe laser light**
R. J. Potton

Papers

- 1867 Real-time measurement of diffraction efficiency in holographic materials with nonlinear responses**
A. Fimia, R. Fuentes, F. Mateos, R. Sastre, J. Pineda and F. Amat-Guerri
- 1875 Effect of slab interfaces on diffraction of visible light by a thick volume grating**
S. A. Maksimenko
- 1889 Statistical properties of the even binomial state**
M. S. Abdalla, M. H. Mahran and A.-S. F. Obada
- 1903 Normal form for Mueller matrices in polarization optics**
R. Sridhar and R. Simon
- 1917 Mask design for square hole pattern using phase reversal imaging**
Y. Takeuchi
- 1929 Diffusion model of hologram formation in dry photopolymer materials**
G. Zhao and P. Mouroulis
- 1941 Sub-Poissonian light and photocurrent shot-noise suppression in closed optoelectronic loop**
A. V. Masalov, A. A. Putilin and M. V. Vasilyev

- 1955 Simple mathematical models for temporal, spatial, angular, and attenuation characteristics of light propagating through the atmosphere for space optical communication: Monte Carlo simulations**
S. Arnon, D. Sadot and N. S. Kopeika
- 1973 Coherence properties of the field produced by an infinitely large, uniform, planar, secondary Lambertian source**
W. H. Carter, A. Gamliel and E. Wolf
- 1983 Phase and amplitude behaviour in conical diffraction near the resonant excitation of surface plasmons**
R. A. Depine and C. I. Valencia
- 1995 Characterization of a metal-clad anisotropic thin film by the guided-wave method**
H. Wang
- 2007 Investigation of magneto-optic mirrors for ring laser gyro applications**
D. A. Andrews and T. A. King
- 2019 A multi-oscillator ring laser with Zeeman bias**
D. A. Andrews and T. A. King
- 2033 On the design of Černý-Turner charge-coupled device spectrographs**
J. F. James
- 2043 Q-switching the erbium-YAG laser**
N. M. Wannop, M. R. Dickinson, A. Charlton and T. A. King
- 2055 Excitation of bound modes in an optical fibre**
S. J. Garth

No. 11 November 1994

Coherent Laser Radar Papers

- 2063 Preface: Coherent laser radar**
J. M. Vaughan
- 2067 Spectral filtering of light possessing non-Gaussian statistics**
G. N. Pearson, M. Harris, E. Jakeman and D. Letalick
- 2079 Coherent infrared lidar with enhanced optical heterodyne detection**
P. Richter, I. Péczeli and S. Böröcz
- 2085 Frequency spectral measurements of a pulsed, TE CO₂ laser incorporating LAWS transmitter design features**
J. T. Sroga, J. C. Petheram, M. S. Bowers, R. Romea and R. W. Lee
- 2101 A semi-analytic approach for coherent laser radar system efficiency. The nearest-Gaussian approximation**
P. Salamitou, F. Darde and P. H. Flamant
- 2115 Heterodyne efficiency for a coherent laser radar with diffuse or aerosol targets**
R. G. Frehlich
- 2131 Spectral matched filters in coherent laser radar**
B. J. Rye and R. M. Hardesty

- 2145 Improvement of heterodyne detection with optical amplifier and pulsed coherent Doppler lidar**
S. Rahm, C. Loth, A. Dabas and S. Elouragini
- 2153 Coherent laser radar and the problem of aircraft wake vortices**
G. Constant, R. Foord, P. A. Forrester and J. M. Vaughan
- 2175 Aircraft wake vortex detection and measurement with pulsed solid-state coherent laser radar**
S. M. Hannon and J. A. Thomson

Letters

- 2197 White-light phase-stepping interferometry for surface profiling**
P. Hariharan and M. Roy
- 2203 Reconstruction of the wavefunction from the photon number and quantum phase distributions**
Z. Bialynicka-Birula and I. Bialynicki-Birula

Papers

- 2209 Analysis of low-coherence excitation of a two-mode fibre waveguide in the Michelson interferometer configuration**
P. Hlubina
- 2221 Multiple short pulses generated by a stimulated Brillouin scattering phase-conjugate cavity**
M. R. Perrone and Y. B. Yao
- 2229 Speckle movement due to a transversal displacement and a rotation of a rough surface**
M. R. Landau, E. N. Hogert, M. A. Rebollo and N. G. Gaggioli

Short communication

- 2233 Pancharatnam's phase for polarized light**
E. de Vito and A. Leviero

No. 12 December 1994

Special Issue: Quantum Communication

Introduction

- 2239 Special Issue on Quantum Communication**
S. M. Barnett, A. K. Ekert and S. J. D. Phoenix
- 2241 Back-action-induced squeezed light in a detuned quantum non-demolition scheme**
P. Grangier, J.-Ph. Poizat, P. Grelu, F. Castelli, L. A. Lugiato and A. Sinatra
- 2259 Squeezing from Raman scattering in optical parametric oscillators**
P. Garcia-Fernandez and Peng Zhou
- 2275 Signal-to-noise ratio of optical system consisting of squeezer and optical Kerr medium**
T. Sasaki-Usuda, T. Satoh, K. Yamazaki and O. Hirota

- 2291 Pulse position modulation and extended pulse position modulation with squeezed light**
A. Vourdas and J. R. F. Da Rocha
- 2301 Wehrl's entropy dynamics in a Kerr-like medium**
I. Jex and A. Orłowski
- 2307 Reduction of quantum entropy by reversible extraction of classical information**
C. H. Bennett, G. Brassard, R. Jozsa, D. Mayers, A. Peres, B. Schumacher and W. K. Wootters
- 2315 Fidelity for mixed quantum states**
R. Jozsa
- 2325 State reduction for correlated photons and eigenstates of unitarily and non-unitarily displaced number operator**
A. Lukš, V. Peřinová and J. Křepelka
- 2343 A new proof of the quantum noiseless coding theorem**
R. Jozsa and B. Schumacher
- 2351 Communication using quantum states**
S. M. Barnett, R. Loudon, D. T. Pegg and S. J. D. Phoenix
- 2375 Information transfer with two-state two-particle quantum systems**
A. Zeilinger, H. J. Bernstein and M. A. Horne
- 2385 A 'pretty good' measurement for distinguishing quantum states**
P. Hausladen and W. K. Wootters
- 2391 Quantum cryptography using polarization feedback**
J. D. Franson and H. Ilves
- 2397 Quantum cryptography with photon pairs**
B. Huttner and A. Peres
- 2405 Quantum cryptography with polarized photons in optical fibres. Experiment and practical limits**
J. Breguet, A. Muller and N. Gisin
- 2413 Quantum cryptography with interferometric quantum entanglement**
A. K. Ekert and G. M. Palma
- 2425 A quantum key distribution channel based on optical fibre**
P. D. Townsend and I. Thompson
- 2435 Quantum random-number generation and key sharing**
J. G. Rarity, P. C. M. Owens and P. R. Tapster
- 2445 Quantum oblivious transfer**
C. Crépeau
- 2455 Information gain in quantum eavesdropping**
B. Huttner and A. K. Ekert
- 2467 Some remarks on quantum coherence**
A. Albrecht
- 2483 Quantum optics of linear systems**
S. Stenholm

- 2491 Quantum perceptrons**
M. Lewenstein
- 2503 Necessary and sufficient conditions for quantum computation**
S. Lloyd
- 2521 Oracle quantum computing**
A. Berthiaume and G. Brassard
- 2537 Nanostructures, entanglement and the physics of quantum control**
M. Keller and G. Mahler
- 2557 Index of Authors**
- iii List of contents**
